37. How is the hair useful on the human body?
38. State any one reason why a coin sinks in water.

39. What happens to the pollen grains as they land on the stigma?

40. Name any one exotic breed of rabbits.

Section B. (60 Marks)

41. (a) Mention any one natural source of sound.

(b) State any two uses of sound in our environment.

(i) _____

(ii) _____

(c) Name any one device that stores sound.

42. (a) Write down any two states of matter.

(i) _____ (ii) _____

(b) How is the convection process useful in our environment?

(c) How does heat travel through vacuum?

43. Study the diagram below and answer questions that follow.

(a) Name the type of teeth marked P and Q as shown in above diagram.

(i) P _____ (ii) Q _____

(b) How is the tooth marked P adapted to its function?

(c) State any one practice done by people to take care of the teeth.

44. (a) Write down any two methods of preserving food.

(i) _____

(ii) _____

(b) Give any one reason why people preserve food.

(c) How does sun drying preserve food?

45. Match the following correctly.

A		B	
(i) Castration		Giving birth in cows.	
(ii) Fertilisation		Removal of male sex organs.	
(iii) Calving		Putting a mark on a cow's body	
(iv) Branding		Union of male and female gametes	
(i) Castration	_____		
(ii) Fertilisation	_____		
(iii) Calving	_____		
(iv) Branding	_____		

46. (a) List down any two examples of chemical changes.

(i) _____ (ii) _____

(b) How are *chemical changes* similar to *biological changes*?

(c) Name any one chemical change that helps to improve on soil fertility.

47. (a) Some rats live in our homes. Why are they not considered as domestic animals?

(b) Write down any two domestic animals kept for milk production.

(i) _____ (ii) _____

(c) State any one way how people care for domestic animals.

48. (a) Name the part of the seed that develops into a root.

(b) State any two uses of roots to a plant.

(i) _____

(ii) _____

(c) Name any one plant with tap root system.

Study the diagram below and answer questions that follow.

(a) Name the parts labelled W and P in above diagram.

(i) W _____

(ii) P _____

(b) How is part Y useful in the diagram above?

(c) How are hairs found in the nose useful during inspiration?

50. (a) Give any two signs of poor feeding in children.

(i) _____

(ii) _____

(b) Name any one example of food stuffs rich in proteins.

(c) Give any one reason why people eat food.

51. (a) Name the part of the skeleton that protects the heart.

(b) Why are left chambers of the heart thicker walled than the right chambers?

(c) How is the heart adapted to its function?

(d) What is the normal pulse rate in human beings?

52. Complete the table below correctly.

DISEASE	VECTOR	PREVENTION
(i) _____	Female anopheles mosquito	Sleeping in a net.
Dysentery	Housefly	(ii) _____
Bilharziasis	(iii) _____	Boiling water
Polio	Cockroach	(iv) _____

53. Study the diagram below and answer questions that follow.

- (a) Name the part of a modern bee hive marked M and N shown above.

(i) M _____ (ii) N _____

- (b) How is part marked M useful on above hive?

- (c) Give any one advantage of keeping bees using above type of hive.

54. (a) A fish lives in water. Give any two ways how a fish is adapted to living in water.

(i) _____

(ii) _____

- (b) What food value do we get from eating fish?

- (c) How is a swim bladder useful to a fish?

55. (a) Write down any two elements of Primary Health Care.

(i) _____ (ii) _____

- (b) Which element of Primary Health Care is promoted by feeding family members on a balanced diet.

- (c) State any one principle of Primary Health Care.
